ZS5Y JF59JR QRV 6m and 2m this weekend. He will be QRV this w-end
for some skeds on 6m and 2m If you have internet, lets meet here
http://www.pingjockey.net/cgi-bin/pingtalkB to set up skeds and
knowing where to beam will be a huge advantage. Contacts can be
Tropo or Meteor Scatter, using WSJT software, FFK441 for MS and
JT65b for Tropo. Let's all start from 05:30 and all meet on the
logger at 06:00. Where to find stations : 144.245 USB and 50.245
USB for digital modes and SSB use 144.200 and 50.200. A lot of
the Div 6 stations will be able to work SSB, but working further
than 400km will require Digital modes. So I for one will be on
144.245 and 50.245 as im to far for a SSB contact. Im sending
this out to the sat mails as well as a lot of the satellite guys
have antennas and SSB radios so they can join if they want.
